

BRIEFING PRESENTATION
ARIZONA STATE LEGISLATURE
STATE SOVEREIGNTY

*Arizona State Senate –
The Arizona State Capitol
Phoenix, Arizona*

*Tuesday –
November the 13th, 2012*

OPENING REMARKS: *LYLE J. RAPACKI, Ph.D.*
Protective Intelligence and Assessment Specialist
Consultant at Behavioral Analysis and Threat Assessment
Private-Sector Intelligence Analyst

It is impossible to comprehend that there should be a debate about the need to secure the border of our State or that of the United States when you realize the reason for secure borders is to protect the lives of Americans, and those living here legally, as well as to help secure a stable economy.

It is equally difficult to make sense, much less comprehend, the need to discuss securing the sovereignty of our state outside the realm of our border, but as we all know there is a new wind blowing across our country, a wind that appears much cooler and inhospitable to the idea of securing and maintaining our sovereignty as a state from far-reaching, never ending intrusive policies and political moves emanating from ideologues with a dedicated agenda to recreate America into something very far from the ideals our Founders fought so long and hard to birth, and then to establish as special and exceptional.

You will learn this morning how devoted adherents of Sustainable Development are promoting, in various ways, a new "Authoritarian State".

BRIEFING PRESENTATION//STATE SOVEREIGNTY

Continued – page two –

You will learn that a plan exists and is aggressively being implemented for the federal government to take control over all land use and not leave any decision making in the hands of private property owners.

You will hear from three accomplished professionals, including a County Sheriff and a City Councilman who already have stood toe-to-toe with the Federal Monster, and have fought the ideology associated with Agenda-21 stating that people are not good stewards of their land, and that government will do a much better job if it is in control. Individual rights are to give way to the needs of communities as determined by a globalist governing body – NOT as determined by elected city councils, or county Boards of Supervisors, or even State Legislatures!

You will hear how this new ideological wind blowing across America cites that the affluence of Americans; the privilege we have to succeed and do well, to prosper, is a major problem with the Global Elites and it needs to be corrected. The well written and orchestrated agenda calls for lowering the standard of living for Americans so that the people in poorer countries will have more; a redistribution of wealth.

People from around the globe still aspire to come to our shores, or walk through our border, to achieve the levels of prosperity we have in our country. These people will risk their lives to get here, and yet, from the highest levels in our government and throughout

the various halls and buildings in Washington, D.C., Americans are cast in a very negative light and the plan is to take the citizens of this great country down to a condition closer to the world's average of poor.

A non-governmental organization called the International Council of Local Environmental Initiatives, ICLEI, is tasked with carrying out these, and many other goals associated with Agenda-21. Over 600 cities and counties in the United States are members, and their costs for accomplishing this collapse is paid for by the taxpayers.

The political philosophy of "Communitarianism" is the foundation by which all this activity stems. This Marxist philosophy states that the individual's rights are a threat to the global community. Our rights to property ownership, to personal mobility and life choices, to feed and clothe ourselves, are a danger to the global community. So we, and each of those activities must be rationed, must be controlled. WE THE PEOPLE must be placed under watch. We must be regulated beyond all current levels of imagination. And ultimately...each of our individual inalienable rights must be weighed against those unnamed rights granted to the world community by the United Nations, and as outlined by Agenda-21.

In addition to this Outline of Bully Behavior I have just mentioned, the new definition for consensus is the neutralized suppression of any spoken opposition. No one is allowed to object to this diabolical plan. No

one is allowed to stand and push back, ask questions, challenge the unfairness, and definitely point-out the breach of Constitutional authority being ushered in by this Marxist set of policies and philosophies.

You came here today, taking precious time away from your hurried schedules, to be briefed on an insidious program already weaving its' way throughout our country. Like tentacles from the worse looking, meanest, scariest monster, Agenda-21 intends to grab everyone and everything in its path and devour it, spitting out something hardly recognizable. The Legislators before you, and those in the audience, have paid a stiff price for standing up and confronting the evil which is: Sustainable Development/Agenda-21. A number of State Representatives – both in the State Senate as well as the House, have been vilified and named "kooks" – or worse!

And Yet...

It is the duty of a State Legislator to always be not only vigilant but suspicious and jealous guardians of the rights of the citizens against encroachments from the federal government; to constantly have their attention awake to the conduct of the national rulers, and to be ready, if anything improper appears, to sound the alarm to the people, and not only to be the VOICE, but, if necessary, the ARM of their discontent!
Alexander Hamilton, Federalist No. 26

Thank you for your attendance. Thank you for caring enough about what is occurring in our Great State of Arizona to come here today, at your own expense, and sit through what should be a very eye-opening, sobering and troubling presentation by three professionals in our neighbor State of California who are living through the nightmare which is: Agenda-21.
