

## ISLAM AND IQ!

Commentary by Peter M. Friedman

With the rioting and murders in Afghanistan resulting from the burning of several Korans that were being used to smuggle messages between terrorists being detained, perhaps it is high time to explain why Muslims react the way they do. Is there a nexus between Islam and a person's IQ? It appears there is based upon statistical and empiracle data. When you actually read the [Koran](#) and the [“religious” obligations](#) it places on Muslims to convert, tax, or [kill non-Muslims](#), it becomes painfully obvious that there IS a relationship between low IQ and the adherence to Islam.

Since Mohammad was born in 570AD, his followers were the “Occupiers” of his time. Mohammad went out of his way to seek out the poor and ignorant to employ them in thuggery, rape, theft, kidnapping for ransom, slavery, and cold-blooded murder, all the while convincing them that their crimes were sanctioned by a deity directly related to the faiths of Judaism and Christianity. The Koran specifically states that deity as being upset with Jews and Christians, which is the reason that that deity brought Islam to the pagan Arabs!

Worse, there are now reports that Obama will allow the Afghans to PROSECUTE anyone, [read US soldiers!] responsible for burning the Korans! “WTF!”

Several years ago an empiricle study was accomplished that compared country's wealth to the relative IQ of its population. The results are stunning, especially in the Muslim-controlled countries! Here's what was found: (quoted directly)

In the book [IQ and the Wealth of Nations](#) by Richard Lynn and Tatu Vanhanen we come across the following statistics regarding the IQ of Muslims in the following countries:

Country	IQ
Qatar	78
Turkey	90
Egypt	83
Iran	84
Iraq	87
Netherlands	85

The Netherlands actually had two studies: Moroccan immigrants averaged 84/85. Turks in the Netherlands scored 88/85.

The Muslims in Turkey, Egypt and Iran are Turkish, Arab and Persian, respectively, so despite different ethnicities and cultures they all score dismally poor. Their common denominator? Their religion.

Muslims brought up in modern, civilized countries don't do any better as the Netherlands' scores show, most likely because Muslims in Europe tend to stay true to their Muslim upbringing which encourages reading the...Quran and disparages reading anything else. Old Muslim saying about books: "If it's in the Quran, it's redundant; if it's not in the Quran, it's not necessary."

The [Infidel Blogger's Alliance blog](#) notes that the stupidest people on Earth come from Islamic countries, just check out the map. (See below)

Muslim violence against infidels and even against other Muslims is precisely due to two things: Muslim's low IQ and their religion. Christians, Buddhists, and followers of the Dalai Lama who might have low IQs do not go out and behead, torture, hang, or burn those with whom they disagree. Perhaps in the ancient past, but in modern times these religions have taken to the peaceful way of life. Not so with Islam.

Certainly one can find a handful of Christian extremists every few years who actually kill or harm someone, but these are rare compared to the hundreds of Muslim atrocities registered every single month at the [Religion of Peace](#).

The Quran in the hands of idiots, morons and imbeciles is just like explosives in the hands of deranged [humans]. Because of its violence, intolerance, savagery and brutality, the Quran should not be read by those with limited intelligence. As Steve Sailer points out, much of France's problems with Muslim rioters is because they are so stupid:

Vdare Blog, [France In Flames: Immigration, Not "Discrimination", Is The Problem](#)

The brutal fact is that the economic failings of France's Muslim and African immigrants stem in large measure from their low average IQ.

A thousand years ago there was a great surge in Arabic science, medicine, and mathematics. Eventually Islam strangled Arab inquisitiveness and so Arabs have been in their dark ages for the past few hundred years.

### Islam--Is It Only for Countries with Low IQ?

<a href="#">Hong Kong (PRC)</a>	107	<a href="#">Russia</a>	96	<a href="#">Fiji</a>	84

<a href="#">Argentina</a>	96	<a href="#">Morocco</a>	85	<a href="#">Equatorial Guinea</a>	59

The tabular data above comes from Lynn and Vanhanen's [IQ and the Wealth of Nations](#). For a good review of Richard Lynn's more recent and comprehensive [Race Differences in Intelligence](#), look [here](#).

Of muslim nations, Malaysia has the highest average IQ, 92. Malaysia's population contains 30% ethnic Chinese. Turkey has the second highest average IQ of muslim nations at 90. All other muslim nations have average IQ's of less than 90--some of them much less.

**Given that population average IQ needs to be at least 90 for a modern technology based nation to function, immigration policy should be oriented toward inviting high value immigrants.**

Observing what happened to Zimbabwe's prosperity after Robert Mugabe drove the most prosperous (and presumably most intelligent) farmers from their land, provides a good example of what NOT to do. Idi Amin's actions in Uganda provide another example. Fidel Castro's actions in Cuba provide a third. **You don't want to drive out your intelligent and resourceful groups.**

Visit [this Fourmilab page for a graphic illustration](#) of the change in average global IQ with projected population trends. Accompanying the animated graphic is a thoughtful discussion of some of the issues involved in projecting trends in global intelligence.

Now that you have read this data, it should be clear that the more America “imports” immigrants from the Muslim-controlled countries, the lower the aggregate IQ of the American population becomes! Since 9/11, because America wanted desperately to show the Muslim world that America did not harbor animosity toward all Muslims for that massacre, America allowed, and even supported Muslim immigration [read infiltration!], of which the Muslims took great advantage! In fact, in 2001 there were only about 900 mosques in America. In 2012 there are over 2100, an increase over 10% each year since 9/11.

Over 2 million Muslim immigrants have relocated to America since 9/11, most of whom have had the support of the American government, at taxpayer expense of course. Most of these Muslim immigrants were classified as “refugees” mostly from Iraq, Somalia, and Afghanistan, with no education, no marketable skills, and low IQs. They have taken low-paying jobs, when they do work, as taxi drivers and convenience store clerks, and rely mostly on welfare to exist. They brought with them their reliance on Islam, which has included honor-killings, wife-beatings, and polygamy. They rely on America’s “tolerance” for freedom of religion regardless of what that “religion” obligates them to do violently. As long as Americans continue to accept Islam, with its violent “religious” obligations as just another legitimate code of behavior equal to the Ten Commandments and the Sermon on the Mount, America will continue to decline to the levels of the average Muslim IQ.
